

FRUIT & NUT TREES 2022

Varieties, prices and their description

- Apple 'Courtland'** **\$99.99** / *Semi-dwarf maturing to 15'x14'*. Red flushed green fruit McIntosh-type of medium size are good for juicing, fresh eating and cooking. Partially self-fruitful, midseason blooming.
- Apple 'Firestorm Honeycrisp'** **\$99.99** / *Semi-dwarf maturing to 15'x14'*. Just like the 'regular 'Honeycrisp', only with a solid rose-red skin when ripe. Needs a pollinator. It is a mid-season bloomer, so it is pollinated by most varieties.
- Apple 'Honeycrisp'** **\$99.99** / *Semi-dwarf maturing to 15'x14'*. Red over yellow 3" fruits are exceptionally crisp and juicy. Excellent for both fresh eating and cooking, one of the best keepers. Needs a pollinator. It is a mid-season bloomer, so it is pollinated by most varieties. Good scab resistance.
- Apple 'Jonathan'** **\$99.99** / *Semi-dwarf maturing to 15'x14'*. Dark red fruits have a good balance of sweet and tart flavor so good for fresh eating as well as pies. Partially self-fruitful, mid-season bloomer.
- Apple 'Liberty'** **\$99.99** / *Semi-Dwarf maturing to 15'x14'*. Red over green, multi-purpose McIntosh type apples that are small to medium sized with good flavor, somewhat tart. The tree itself is very disease resistant, good for organic gardening. Needs a pollinator, early to mid-season blooming.
- Apple 'Macoun'** **New \$99.99** / *Semi-dwarf maturing to 15'x14'*. A McIntosh-type medium-large apple with red over green skin and firm white flesh. Needs a pollinator, mid to late season blooming. Best for fresh eating.
- Asian Pear 'Shinseiki'** **New \$99.99** / *Matures to 15'x10'*. Smooth yellow fruit with little russet and firm juicy flesh with a hint of spice. Ripens over several weeks starting in August. Moderate fireblight resistance. Self-pollinating.
- Paw Paw** **\$8.99** / *Asimina triloba* / *Matures to 25 feet tall by 15' wide, possibly larger*. Easy to grow native fruit tree with large tropical looking leaves and interesting maroon flowers. Large, sweet fruit ripens in fall and is very flavorful as well as nutritious. 2-3+ trees are needed to ensure pollination. Available in June.
- Persimmon** **\$8.99** / **\$23.99** / *Diospyros virginiana* / *Matures to 55' tall by 30 feet wide*. Large native tree with pale orange fruit that ripen in late October are the sweetest after the first hard frost. 2-3 trees are needed to ensure pollination. Trees may take 10-15 years to start bearing fruit.
- Plum, American Red** **New \$59.99** / *Prunus americana* / *Matures to 35'x70'*. A suckering plant that can be used for erosion control. White spring flowers followed by sweet edible fruit. Good for pies, jellies, and preserves. Indiana native.
