PINECONES

This page is to help you understand the order form when choosing pinecones and also for you to see what cones we have available.

BASIC

In most cases we will use ponderosa pinecones, except extra large or smaller items. The large items such as 30" wreaths and larger we use larger cones such as slash pine, large ponderosa, or Jeffery pine. For smaller items such as 12 inch wreaths we use scotch pine, red pine, firs or spruce. Standard for 18"-24" wreaths is 3 cones. For 30" we use 4 cones, and for 36" we use 5 cones. The larger size wreaths most times look better with larger cones or extra cones or the cones will look lost in the wreath. So if you choose basic on the order form, we will do what we standardly think looks best for the wreath or other item.

Mixed

Mixed pine cones means we will mix up the types to give a more unique look to your item.

Extra

Extra means we will add extra pinecones to your item, usually adding a mix of a smaller and larger cone, or two different types, whichever looks best.

Small

Means we will only use smaller cones on your item.

Large

Means we will only use larger cones on your item.

Gold

Means we will only use gold painted cones on your item. We only have medium sized cones, so we don't recommend them for larger items.

White-tipped

Means we will only use white tipped cones on your item. We only have medium sized cones, so we don't recommend them for larger items.
